

# Fully-Automatic High Resolution Inkjet Printer

Model:PM-900

fully-automatic

high resolution

Based on the HP print technology , fully-automatic high resolution inkjet printer PM-900 is a new type touch-screen high resolution inkjet printer. Different from traditional inkjet printer, this kind of inkjet printer has the characteristics of high resolution and high printing speed. At the same time, the inkjet printer can control 1-8 print heads, and cooperate with various production lines to print two-dimensional code, text, batch, date, three times, pictures and other information.

- ◆ 1.7-inch touch screen operation interface: simple appearance, easy to operate.
- ◆ 2.Support quickly identify one-dimensional code, two-dimensional code printing.
- ◆ 3.The number of nozzles can be adjusted to increase the printing height: single head spray printing height 12.7mm, you can increase the number of nozzles, improve printing height.
- ◆ 4.The printing unit is diversified: The system can support multiple printing units, can be customized according to customer needs.
- ◆ 5.Strong adaptability:Able to adapt to various leaflets and roll paper feeding platforms.
- ◆ 6.The printed bar code can meet the national drug regulatory code standard.
- ◆ 7.Import of environmental protection ink:the application of drug and food requirements.
- ◆ 8.Dedicated centralized ink supply system: The ink can be added without stopping, saving time and labor, improving the printing quality and the production efficiency at the same time.
- ◆ 9.Intelligent control inkjet printing ink software: Ink jet printing software is equipped with intelligent management control function, saving in later period.
- ◆ 10.System full English interface, simple operation.
- ◆ 11.Full metal jacket: Beautiful industrial design makes the whole body more solid and the machine runs more stably.
- ◆ 12.Can be combined numbers, Chinese characters, english arbitrary according to customer demand.
- ◆ 13.HP Independent Penma: HP independent Penma nozzle, maintenance-free.
- ◆ 14.The system is equipped with the detection function with the database of drug regulatory code to eliminate mistakes from the source.

Model	High Resolution inkjet Printer PM-900
Printing system	HP 2.5
Printing height	12.7 mm - 50.8 mm
Resolution	38M/MIN 600*600DPI 76M/MIN 600*300DPI
Interface	Ethernet port / USB
Display	7 inch touch screen
Print type	Text,batch,database,picture,two-dimensional code,bar code
Power supply	110-220VAC 50/60Hz
Others	Analog speed print & simulated eye print

◆ **Printing Material**

Corrugated paper, plastic film box, flexible packaging, hard plastics, paper boxes and liquid containers.

◆ **Application field**

The inkjet Printer is used for food, beverages, cosmetics, personal care, pharmaceutical and building materials.
